

Load Cell Tester LC-108

DATA SHEET

SPECIFICATIONS AND FEATURES

- Large six digit LED display.
- Easy to use and small in size.
- Accuracy of 0.005%FS/10ppm
- 2 channels
 - CH0: -12mV/V~+12mV/V, with resolution 0.1uV/V
 - CH1: -1.6mV/V~+4.8mV/V, with resolution 0.01uV/V
- Four user selectable output units (N, kgf, lbf and mv/V)
- Peak Hold function to capture and holding the peak value for the immediate or later reference
- Clear key to clear the peak value
- Presence of tare key and foot switch to zero the display (tare function)
- Great for monitoring and testing any load cell characteristics (repeatability, linearity, creeping, temperature drift, etc)
